Experiment # 1

Installationthe setup of Python

Objective

To download and install the setup of Python

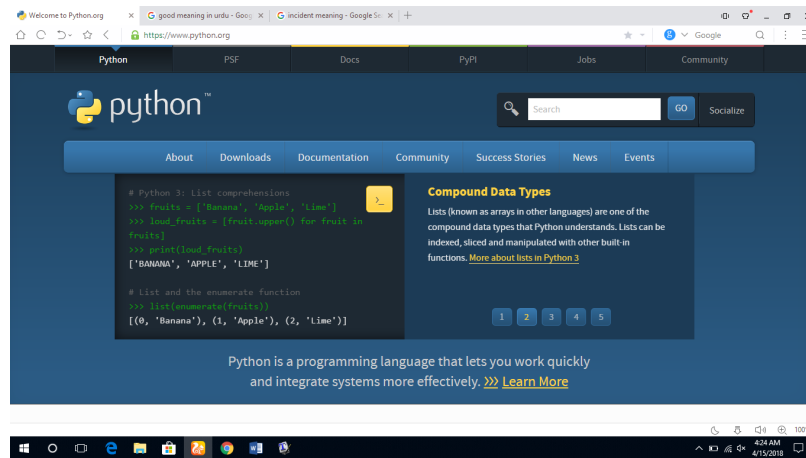

Software Tool

1. Operating system window 10
2. sublime version 3.0
3. python

0.1 Procedure: Task 1

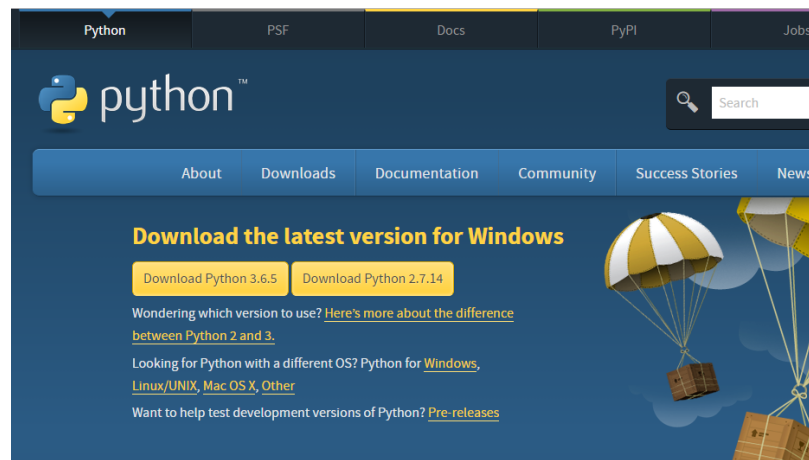

1 Python downloading Steps

- 1.The following screen will be show on google chrome.

2. Click the download Python 2.7.13
3. The file named python-2.7.13.exe should start downloading into your standard download folder.

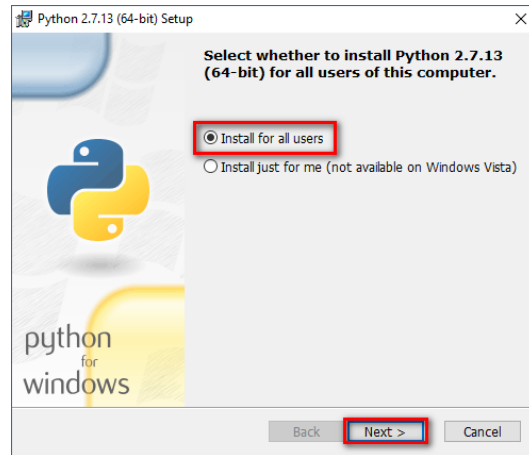

4. Move this file to a more permanent location, so that you can install Python.
5. Feel free to explore this webpage further; if you want to just continue the installation, you can terminate the tab browsing this webpage.
6. Start the Installing instructions directly given below .

2 Procedure: Task 2

2.1 Python Installations Steps

1. Double-click the icon labeling the file python-2.7.14 exe.

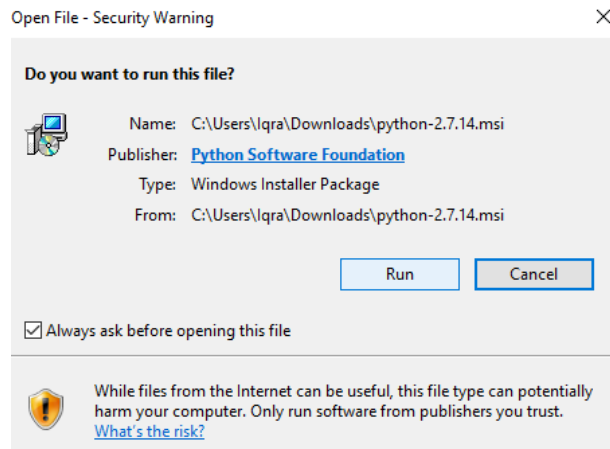

2. Select the destination directory

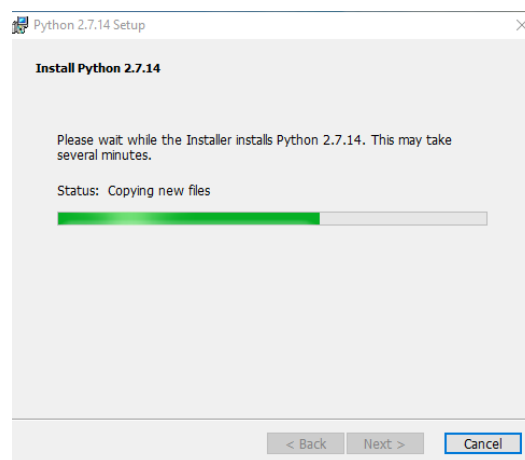

Ensure that the Install launcher for all users (recommended) and the Add Python 2.6 to PATH checkboxes at the bottom are checked

3. Click the Yes button.

4. A new Python 2.7.13 (64-bit) Setup pop-up window will appear with a Setup Progress message and a progress bar.

5. During installation, it will show the various components it is installing and move the progress bar towards completion. Soon, a new Python 2.7.13 (64-bit) Setup pop-up window will appear with a Setup was successfully message.

5. Click the Finish button.

3 Conclusion

Successfully the setup of Python would be downloaded and installed.
